

Abbreviated Résumé

Name: Dr. Khalid M. Zubier

Nationality: Saudi

Current Position: Assistant Professor

Research Area:

- Simulating wave conditions on both oceanic and coastal scales using numerical wave models of different types.
- Collection and analysis of wave, current, sea level and wind data using most advanced techniques.
- The impacts of eutrophication parameters on the coastal marine environments.
- The roles played by the water dynamics on the coastal marine ecosystems.

Corresponding Address: In the following format

Marine Physics Department

Faculty of Marine Sciences

King Abdulaziz University
